

Department for operating electrical power networks and equipment

List of operated electrical equipment

#	EQUIPMENT
1	Electric substations 110/35/6 kV
2	Electric substations 35/6 kV
3	Outdoor packaged transformer substations 6-10/0,4 kV
4	Packaged transformer substations 6/0,4 kV
5	Linear control units 35 kV
6	Linear control units 6 kV
7	Overhead transmission lines 110 kV
8	Overhead transmission lines 35 kV
9	Overhead transmission lines 6 kV
10	Cable lines 0,4 - 6 kV
11	Electrical switchgear 6 kV
12	Electric engines 0,4 - 6 kV

Staff training at the training station with simulating equipment

Training courses

- ✓ Electrician operating transformer electric substation
- ✓ Electrician operating overhead transmission lines
- ✓ Electrician operating technological platforms and ground electrical equipment

Training station with simulating equipment

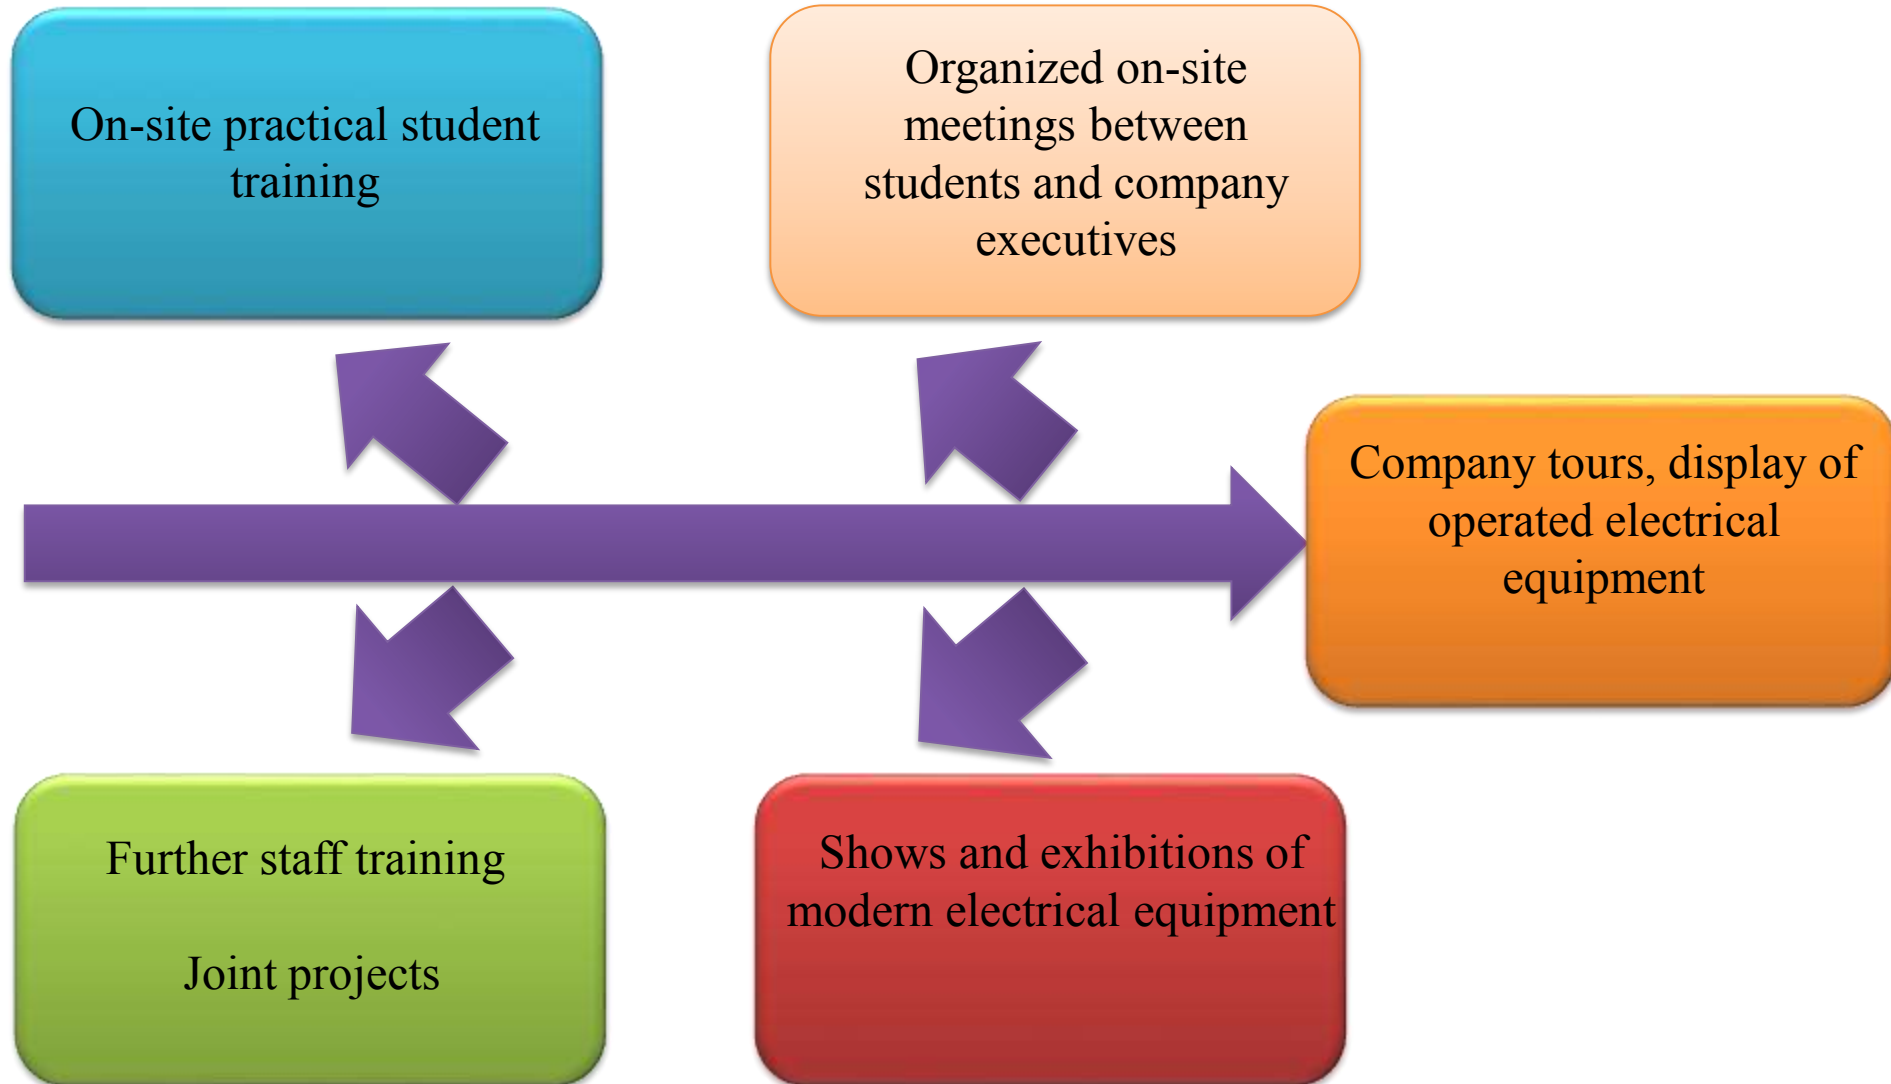

Open air staff training station

Training station with simulating equipment

Indoor staff training station

Collaboration with NVSU

Collaboration with NVSU: Outcomes

For NVSU

- ✓ Students study and practice currently operated electrical equipment used at oil production field
- ✓ Opportunity for joint projects and research

For the employer

- ✓ Opportunity to monitor the quality, skills and knowledge of potential employees
- ✓ Further training of potential employees
- ✓ Candidate pool
